* Consumption only 200w

CENTRAL HEATING AND COOLING SYSTEMS

The GREEN Air promotes and supports the entire range of technologies available, providing solutions to all applications HVAC - Heating, domestic - commercial - business - industrial, with systems splits, multi-splits, VRV, chillers, Heat pumps, fan coils, vents, radiators, under-floor heating or a combination thereof, and plumbing.

RADIATOR / CENTRAL HEATING

- German radiators
- Efficient and effective heating
- Superior Quality
- Long lasting materials

UNDERFLOOR HEATING

- Even heat distribution
- Saving energy
- Ecologically
- Suitable for allergy sufferers

AIR CONDITIONING

- Commercial and Domestic
- VRV, Chillers, Split Units
- Top quality
- Saving energy
