

LORENTZ Sun Powered Pool Pump System

Your Pool costs more than 1000 Euro per year for electricity

SAVE THAT MONEY NOW

No E.A.C. bills for the next 15 years

Electricity for the Pool Pump is free from Sunup to Sundown using the energy of the Cyprus Sun:

- > In a few years your investment in a Lorentz Pump system pays for itself in savings.
- > Maintenance-free DC motor thanks to the GERMAN Lorentz brushless technology.
- > Pump guarantee is 10 years and life span of the Photovoltaic Modules is more than 25 years (German cells).
- > Only 3 Solar Modules necessary for average size pool.
- > The Solar pump is powerful enough to operate with existing pool heaters and cleaners.
- > More running hours along with the sunshine every day filters the pool water with 120-150 tons per day = less chemicals and less cleaning time, less costs.

**100% SAFE Investment in Solar Energy
unlike your money in the Bank**

Sun Powered Pool Pump System

- >You save more than 1000 Euros per year on electricity costs
- >**The moment installed NO more EAC bills to pay for the next decade**
- >New: Stronger DC pump from Lorentz Germany
- >**System runs from Sunup to Sundown even without sunshine**
- >Maintenance free motor thanks to brush-less technology
- >**Pump designed for more than 10 years life span**
- >Photovoltaic modules with 25 years guarantee (German cells)
- >**Pool Pump running hours along with the sunshine circulate the content of your pool 3-4 times every day = Less chemicals, less cleaning time, less costs**
- >Only 2-4 Photovoltaic modules necessary depending on pool size
- >**This investment is absolutely safe and pays for itself**

Visit us at our **NEW SHOWROOM** to see our products.

LORENTZ

Sun. Water. Life.

GERMAN Solar System working even in Winter when you need hot water

Save the high electric back-up costs you normally pay (now each kW/h > 25cent)

High efficient Thermosiphon System from Wagner Germany

Exchange your old Solar System and save money every day

- > Top class solar panel (95% absorption, 5% losses)
- > Storage cylinder with 50 mm insulation (no losses at night)
- > No overheating in summer through temperature limitation of 80 °C
- > No lime scaling through close circuit with Solar fluid (antifreeze)
- > No more water losses with a leaking system
- > 10 years guarantee from Wagner Germany
- > 2 sizes available (160 & 300 liters) for flat roof or tilted roof
- > Competitive prices through direct import (no middle man)

THE SPECIALISTS IN ENERGY SAVING

Solar Powered Central Heating System (SOLAR THERMAL)

Including Pool Heating + Domestic Hot Water production in one

Large savings of fuel and electricity costs through high System efficiency as you use the free power of the Cyprus Sun for more than nine month per year for your central heating as well as for pool heating in spring and autumn and domestic hot water when you need it the most, in Winter, without using the electric heater switch any more.

>Thanks to the high performance German made Solar panels (95% absorption of sun, 5% losses) and the well insulated energy storage cylinder it needs only 1 hour of sun to heat up 230 liters of water to 60°C.

>In Winter the system is supporting your central heating with hot water in order to reduce fuel consumption. All day long energy from the sun will be transferred to your house for free.

>The 1000 liter cylinder will store excess energy and support the heating at night time.

>In spring and autumn the energy not needed for house heating will be automatically transferred to the pool via heat exchanger to avoid contact with pool chemicals.

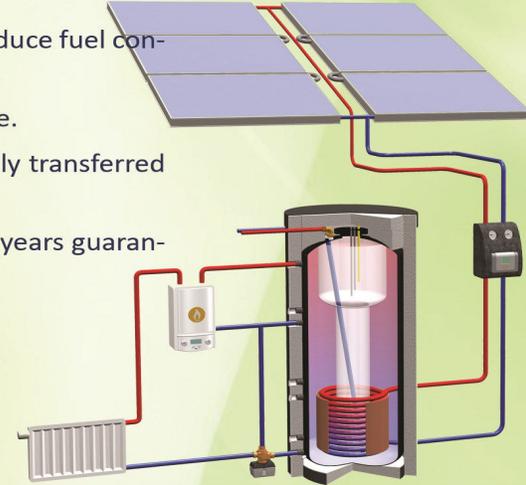

>All components are produced from the leading German company WAGNER with 10 years guarantee.

>Installation from qualified technicians under supervision of our engineers.

>Only 6-8 panels are necessary for average house and pool.

>Competitive prices through direct import from Germany.

>In 2012 there will be 55% subsidy from the Government on the total costs.
